Mike Smith

Aspen

Dear Mike,

It is my pleasure to write this letter of recommendation for anyone interested in using the services of your company. We hired Aspen Builders, Inc. to serve as GC for the construction of our Claremont 5 Theatre in Claremont CA. We worked closely with Jim and Mike on the design with our architect and consultants. The number that Aspen bid the job was the number that they delivered on. Mike and staff ran a very organized, clean and safe job site. While the staging area was quite limited and there were regular issues of coordination with the master developer's contractor, Aspen was always able to keep the job moving forward and delivered on a timely basis. We were very pleased with the quality of subcontractors that Aspen brought to the job and their attention to detail. Mike was able to catch and correct a number of inconsistencies in the design that kept us from change orders. I highly recommend Aspen Builders, Inc. for any commercial construction job and particularly for any theatre related job based on my positive experience working closely with them.

Sincerely,

Jay Reisbaum
